Želovce, Slovakia

13.500t/year

We produce TOP Quality A1 premium pellets using the most modern pelletizing line in Slovakia. The raw material is the best of Central Europe: Slovak spruce. The technology used is the best in the world: Amandus Kahl, German technology which produces high-quality firm pellets without defective crumbling. Our factory is located in South Slovakia, in the Želovce Energy Centre, and is run on 100% renewable energy – biogas.
